

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

Claim 1 (Currently amended): A method of reducing ~~GAG~~
glycosaminoglycan (GAG) content in a glial scar of a mammal comprising ~~inhibiting~~
administering to the glial scar of the mammal an agent that inhibits one or more of
the following:

~~inhibiting~~ the expression of primary proteoglycans;

~~inhibiting~~ the expression and/or activity of a chain initiation enzyme;

and

~~inhibiting~~ the expression and/or activity of a chain elongation enzyme;

wherein the agent is selected from the group consisting of antisense
oligonucleotides that bind a nucleic acid sequence encoding proteoglycans,
ribozymes, DNA enzymes, RNAi constructs, and small molecules.

Claim 2 (Currently amended): The method of claim 1, ~~wherein~~ the primary
proteoglycans ~~are~~ being selected from the group consisting of neurocan, NG2, and
phosphocan.

Claim 3 (Currently amended): The method of claim 1, ~~wherein~~ the chain
initiation enzyme ~~is~~ being a xylotransferase.

Claim 4 (Withdrawn): The method of claim 1, wherein the chain elongation enzyme is selected from the group consisting of N-acetylgalactosaminyl transferase, glucuronosyltransferase, glucosaminyltransferase, galactosaminyltransferase, N-sulfotransferase, 6-sulfotransferase, 3-sulfotransferase, 1,4-glucosaminyltransferase, 1,4-galactosaminyltransferase, N-acetylglucosamine, and glucuronic acid.

Claims 5-6 (Canceled)

Claim 7 (Withdrawn): The method of claim 6, wherein the antisense oligonucleotide binds a nucleic acid as set forth in any one of SEQ ID No: 17, SEQ ID No: 19, SEQ ID No: 21, SEQ ID No: 23, SEQ ID No: 25, SEQ ID No: 27, SEQ ID No: 29, and SEQ ID No: 31.

Claims 8-9 (Canceled)

Claim 10 (Withdrawn): The method of claim 9, wherein the antisense oligonucleotide binds a nucleic acid as set forth in any one of SEQ ID NO: 1, SEQ ID NO: 3, SEQ ID NO: 5, SEQ ID NO: 7, SEQ ID NO: 9, and SEQ ID NO: 11.

Claim 11 (Withdrawn): The method of claim 8, wherein the antisense oligonucleotides are selected from the group consisting of SEQ ID NO: 37 and SEQ ID NO: 38.

Claim 12 (Currently amended): The method of claim 8 ~~1~~, ~~wherein~~ the agent is being a DNA enzyme.

Claim 13 (Currently amended): The method of claim 12, ~~wherein~~ the DNA enzyme is being set forth in SEQ ID NO: 33 or SEQ ID NO: 39.

Claim 14 (Withdrawn): The method of any one of claims 1 or 4, wherein expression and/or activity of the chain elongation enzyme is inhibited by administering an agent.

Claim 15 (Withdrawn): The method of claim 14, wherein the agent is selected from the group consisting of antagonists, antibodies, antisense oligonucleotides that bind a nucleic acid sequence encoding a chain initiation enzyme, ribozymes, DNA enzymes, RNAi constructs, and small molecules.

Claim 16 (Withdrawn): The method of claim 15, wherein the antisense oligonucleotide binds a nucleic acid as set forth in any one of SEQ ID No: 13 or SEQ ID No: 15.

Claim 17 (Currently amended): A method of promoting neuronal regeneration in a subject comprising inhibiting administering an agent to a nervous system lesion to inhibit a GAG chain initiation enzyme-, wherein the agent is selected from the group consisting of antisense oligonucleotides that bind a nucleic acid

sequence encoding proteoglycans, ribozymes, DNA enzymes, RNAi constructs, and small molecules and wherein the neuronal regeneration includes neurite extension into the nervous system lesion.

Claim 18 (Currently amended): The method of claim 17, ~~wherein~~ the chain initiation enzyme is comprising a xylotransferase.

Claims 19-20 (Canceled)

Claim 21 (Withdrawn): The method of claim 20, wherein the antisense oligonucleotide binds a nucleic acid as set forth in any one of SEQ ID NO: 1, SEQ ID NO: 3, SEQ ID NO: 5, SEQ ID NO: 7, SEQ ID NO: 9, and SEQ ID NO: 11.

Claim 22 (Withdrawn): The method of claim 20, wherein the antisense oligonucleotides are selected from the group consisting of SEQ ID NO: 37 and SEQ ID NO: 38.

Claim 23 (Currently amended): The method of claim ~~20~~ 17, ~~wherein~~ the agent is being a DNA enzyme.

Claim 24 (Currently amended): The method of claim 23, ~~wherein~~ the DNA enzyme is being set forth in SEQ ID NO: 33 or SEQ ID NO: 39.

Claim 25 (Original): The method of claim 17, further comprising administering a growth factor or a neurotrophic factor.

Claim 26 (Currently amended): The method of claim 25, ~~wherein~~ the neurotrophic factor ~~is~~ being selected from the group consisting of nerve growth factor, brain-derived growth factor, neurotrophin 3, neurotrophin 4, neurotrophin 5, glial derived neurotrophic factor, and ciliary neurotrophic factor.

Claim 27 (Currently amended): The method of claim 25, ~~wherein~~ the growth factor ~~is~~ being basic fibroblast growth factor.

Claim 28 (Currently amended): The method of claim 26 ~~or 27~~, further comprising administering a proteoglycan specific enzyme.

Claim 29 (Currently amended): A method of ~~for screening to identify~~ identifying and/or ~~characterize~~ characterizing an agent, ~~wherein said agent is capable of~~ the method comprising screening a library of agents capable of one or more of the following:

- (i) inhibiting the expression of a primary proteoglycan;
- (ii) inhibiting the expression and/or activity of a chain initiation enzyme;
- (iii) inhibiting the expression and/or activity of a chain elongation enzyme; or

(iv) inhibiting the expression and/or activity of a chain sulfation enzyme.

Claim 30 (Currently amended): The method of claim 29, ~~wherein said the~~ agent ~~promotes~~ promoting neuronal regeneration neurite extension and/or ~~promotes~~ the inter-mixing of Schwann cells and astrocytes.

Claim 31 (Currently amended): A method ~~of for~~ screening to identify identifying and/or ~~characterize~~ characterizing an agent, ~~wherein said agent is~~ capable of the method comprising screening a library of agents capable of one or more of the following:

- (i) reducing scar formation;
- (ii) promoting inter-mixing of Schwann cells and astrocytes; or
- (iii) promoting ~~neuronal regeneration~~ neurite extension.

Claims 32-33 (Canceled)

Claim 34 (Currently amended): The method of claim ~~29 or~~ 31, further comprising formulating a pharmaceutical preparation of an agent identified and/or characterized by ~~said the~~ the method and a pharmaceutically acceptable carrier or excipient.

Claim 35 (Withdrawn): A pharmaceutical preparation comprising an agent identified by the method of claim 29 or 31 and a pharmaceutically acceptable carrier or excipient.

Claim 36 (Currently amended): The method of claim 34, further comprising packaging, marketing, and selling ~~said~~ the pharmaceutical preparation.

Claim 37 (Withdrawn): A kit comprising the pharmaceutical composition of claim 35 and instructions for the use of said pharmaceutical preparation in human or non-human patients.

Claim 38 (Withdrawn): Use of an agent in the manufacture of a medicament for decreasing expression and/or activity of a xylotransferase, wherein said agent is a DNA enzyme that binds to and inhibits expression and/or activity of a xylotransferase.

Claim 39 (Withdrawn): Use of an agent in the manufacture of a medicament for decreasing expression and/or activity of a xylotransferase, wherein said agent is an antisense oligonucleotide that binds to and inhibits expression and/or activity of a xylotransferase.

Claim 40 (Withdrawn): A composition comprising an agent, wherein said agent inhibits the expression and/or activity of a xylotransferase, and wherein said

agent is a DNA enzyme that binds to and inhibits expression and/or activity of a xylotransferase.

Claim 41 (Withdrawn): A composition comprising an agent, wherein said agent inhibits the expression and/or activity of a xylotransferase, and wherein said agent is an antisense oligonucleotide that binds to and inhibits expression and/or activity of a xylotransferase.

Claim 42 (Withdrawn): A composition comprising an agent, wherein said agent inhibits the expression and/or activity of a xylotransferase, and wherein said agent is an RNAi construct that binds to and inhibits the expression and/or activity of a xylotransferase.

Claim 43 (Withdrawn): The composition of any of claims 40-42, wherein the xylotransferase is XT-I.

Claim 44 (Withdrawn): The composition of any of claims 40-42, wherein the xylotransferase is XT-II.

Claim 45 (Withdrawn): The composition of any of claims 40-42, wherein the xylotransferase is XT-I and XT-II.

Claim 46 (Withdrawn): A DNA enzyme as set forth in SEQ ID No: 33 or SEQ ID NO: 39.

Claim 47 (Withdrawn): An antisense oligonucleotide as set forth in any one of SEQ ID No: 37 or SEQ ID No: 38.

Claim 48 (Withdrawn): A composition comprising a DNA enzyme, wherein said DNA enzyme binds to and inhibits the expression and/or activity of a xylotransferase, wherein said DNA enzyme is represented by the general formula:

wherein X corresponds to a DNA enzyme nucleotide sequence B_1 corresponds to a nucleotide sequence complementary to a nucleotide sequence of a xylotransferase, and B_2 corresponds to a nucleotide sequence complementary to a nucleotide sequence of a xylotransferase, and wherein B_1 and B_2 are complementary to nucleotide sequences of a xylotransferase that are adjacent but separated by at least one nucleotide.

Claim 49 (Withdrawn): The composition of claim 48, wherein the xylotransferase is XT-I.

Claim 50 (Withdrawn): The composition of claim 48, wherein the xylotransferase is XT-II.

Claim 51 (Withdrawn): The composition of claim 48, wherein the xylotransferase is XT-I and XT-II.

Claim 52 (Withdrawn): The composition of claim 48, wherein said composition is a pharmaceutical composition formulated in a pharmaceutically acceptable carrier.

Claim 53 (Withdrawn): Use of an agent in the manufacture of a medicament for decreasing GAG content, wherein said agent is a DNA enzyme that binds to and inhibits expression and/or activity of a xylotransferase.

Claim 54 (Withdrawn): Use of an agent in the manufacture of a medicament for decreasing GAG content, wherein said agent is an antisense oligonucleotide that binds to and inhibits expression and/or activity of a xylotransferase.

Claim 55 (New): The method of claim 1, the agent being administered intrathecally or across the blood brain barrier to the glial scar.
